

Case Study

Waardenburg Consulting

How Waardenburg Consulting saved time by using SPDockKit to automate repetitive tasks

About the Company

Waardenburg Consulting Case Study

[Waardenburg Consulting](#) is a SharePoint consulting agency founded in 2014 in the Netherlands. Waardenburg's main activities include SharePoint farm design and development, as well as the configuration and documentation of existing farms.

Challenge: Productive Farm Setup

Waardenburg Consulting Case Study

Waardenburg Consulting works with various clients that need help with **setting up and maintaining a SharePoint environment**. Their clients come in all different sizes with diverse and complex environments.

Setting up farms is a common task for Waardenburg Consulting. The main problem is that there is just **no easy way to document a SharePoint configuration**. Doing this manually is inefficient and so slow that its duration can exceed the client's billable hours.

Solution: SPDocKit SharePoint Tool

Waardenburg Consulting Case Study

Before acquiring SPDocKit, Waardenburg tried many different out-of-the-box tools and custom PowerShell scripts. None of them were the perfect fit for the problem he had. Sharing his thoughts and troubles with a colleague, he stumbled upon SPDocKit.

They were finally satisfied. SPDocKit has helped them with their daily tasks and routines like:

- generating SharePoint documentation,
- comparing farms and tracking changes,
- auditing farm configuration.

*"There are other tools,
expensive tools, but none
of them is as effective nor
as affordable as
SPDockKit."*

*– Meindert Jan Waardenburg, SharePoint
Consultant, Waardenburg Consulting*

Results: Simpler Farm Setup

Waardenburg Consulting Case Study

SPDocKit has saved Waardenburg Consulting a significant amount of time, which is a valuable bonus in the dynamic business of being a SharePoint consultant.

Something that was once a daunting task, consuming a lot of a consultant's valuable time, is **now a simple command** in SPDocKit.

"I would definitely recommend it."

– Meindert Jan Waardenburg, SharePoint Consultant, Waardenburg Consulting

Results: Easier Farm Comparison

Waardenburg Consulting Case Study

Farm configuration reports are the most useful feature.

Another tool that is a tremendous help is a compare feature. It allows him to compare two farms, and easily find out when a problem occurred, and whether it was a configuration issue or something else.

"Comparing the configuration of farms is a great benefit."

– Meindert Jan Waardenburg, SharePoint Consultant, Waardenburg Consulting

The Ultimate SharePoint Admin Tool

SPDockKit is every SharePoint administrator's must-have tool, offering a multifunctional administration experience- use it for **documenting, reporting and managing SharePoint farm.**

Benefits of using SPDockKit

Save time by automating routine administrators' tasks.

Increase data security and enforce governance policies.

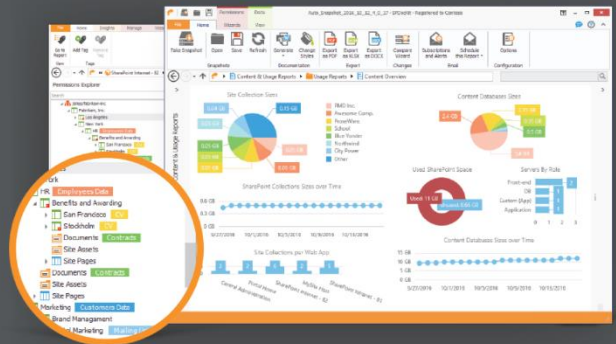

Audit configuration and enhance SharePoint farm performance.

What does SPDockKit allow you to do?

- › Create professional-looking SharePoint documentation in just a few clicks
- › Explore, manage, and report on SharePoint permissions
- › Validate farm configuration according to the latest SharePoint best practices
- › Take snapshots to compare farms and track changes in farm configuration
- › Establish your own particular SharePoint rules and run custom queries to enforce governance policies
