

Introduction of Process Management Systems, Quality, and Information Security - SYSKIT Ltd.

About the Project:

Founded in 2009, SysKit Ltd. has specialized in creating high-quality business monitoring and management solutions.

On the public announcement of the "Introduction of Business Process and Quality Management System (ISO and similar standards)" (Reference: KK.03.2.1.14 - Version 2) we have applied our project named „Introducing a system of process management, quality and information security - SYSKIT Ltd.“ in order to increase competitiveness in the domestic and foreign markets and in order to expand the company with its strategic goals.

Objectives and expected results of the ISO implementation project:

The project "Introduction of Business Process Management, Quality and Information Security of SYSKIT Ltd." aims to introduce ISO 9001 and ISO 27001 management standards. Implementing these standards and acquiring an ISO certificate will result in increased customer satisfaction, as well as more efficient and secure business continuity, in the interest of stakeholders, employees, customers, and suppliers.
